

Senior Geologist

Position reports to Chief Operating Officer

▪ Job Purpose Summary

- The Senior Geologist is a valued member of the project team, responsible for a wide array of tasks aimed at delivering high quality, innovative products and services to clients in a timely fashion.
- The individual must display an in-depth understanding of geology including industry best practices and trends. Specific knowledge of potash, uranium, and oil would be an asset.
- Professionalism and strong work ethic are imperative as the Senior Geologist will be a representative of North Rim.
- This individual will exhibit leadership, interpersonal skills, attention to detail and quality, and have an approachable nature that encourages mentorship and knowledge transfer to Junior and Intermediate geologists.

▪ Key Responsibilities

- As a Project Team Member, or as a Project Team Leader (PTL) effectively lead team to attain the goals of the project for the client and for the company, ensuring quality of product, timely delivery of service, and maintaining profitability standards as set out by the project.
- Establish and conduct QA/QC verification of procedures and protocols for lab and field-based work based on area of expertise.
- Conduct resource modelling and estimations for projects using North Rim's current techniques.
- Senior review of technical work relating to area of expertise. Act as primary author and Independent Qualified Professional of 43-101 Technical reports in the area of expertise.
- Identify opportunities for innovation and service improvement. Provide feedback to the management team and work with them to facilitate the development of these opportunities.
- Assist the Geoscience Manager with technical mentorship of staff and evaluation professional development needs.
- Work with the Management team on business development strategy for companies operating within the Senior Geologist's area of expertise. Assist Business Development Manager with execution of business development plans for target clients.

Qualifications

- Bachelor of Science in Geology or equivalent.
- Eligibility for registration with professional affiliation as a Professional Geologist with APEGS.
- Over 10 years of professional experience in the field of Geoscience with a minimum of 5 years of experience with mineral resource calculation in the applicant's area of expertise.
- Professionalism and integrity in representing North Rim to the industry and business community.

Please submit resumes to gfiendell@northrim.sk.ca. Only qualified candidates will be contacted.
